THE CCI REGION OF HALLE-DESSAU

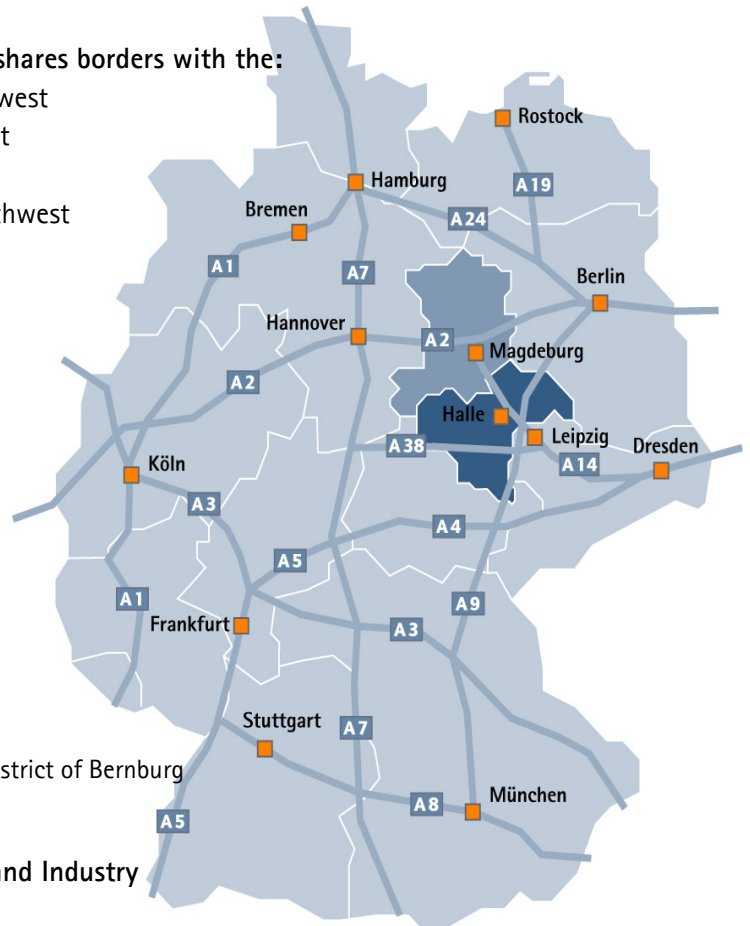

is located in the south of Saxony-Anhalt and shares borders with the:

- CCI Region of Magdeburg in the northwest
- CCI Region of Potsdam in the northeast
- CCI Region of Leipzig in the southeast
- CCI Region of Ostthüringen in the southwest
- CCI Region of Erfurt in the west
- CCI Region of Cottbus in the east

encompasses the rural and urban districts:

- Anhalt-Bitterfeld
- Burgenlandkreis
- Dessau-Roßlau
- Halle (Saale)
- Mansfeld-Südharz
- Saalekreis
- Salzlandkreis* / Bernburg
- Wittenberg

*only the region belonging to the former district of Bernburg

As of 30.06.2013 the Chamber of Commerce and Industry Halle-Dessau comprises:

- 53,519 member companies
- 3 staffed offices
- 5 contact centers

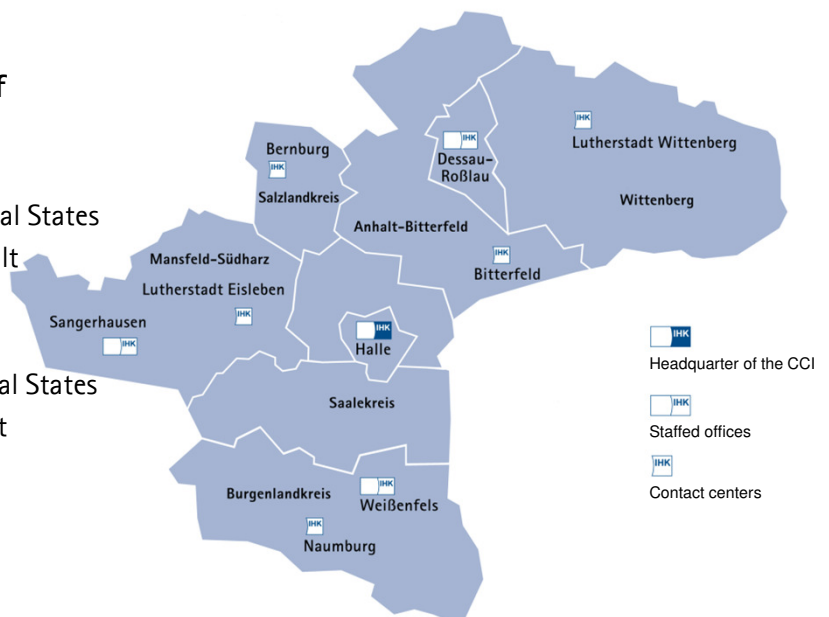

The CCI Region of Halle-Dessau in brief

1.194.713 inhabitants

- 1.5 % of the total population of Germany
- 9.5 % of the population of the New Federal States
- 52.9 % of the population of Saxony-Anhalt

8.475 km² area

- 2.4 % of the total area of Germany
- 7.9 % of the total area of the New Federal States
- 41.4 % of the total area of Saxony-Anhalt

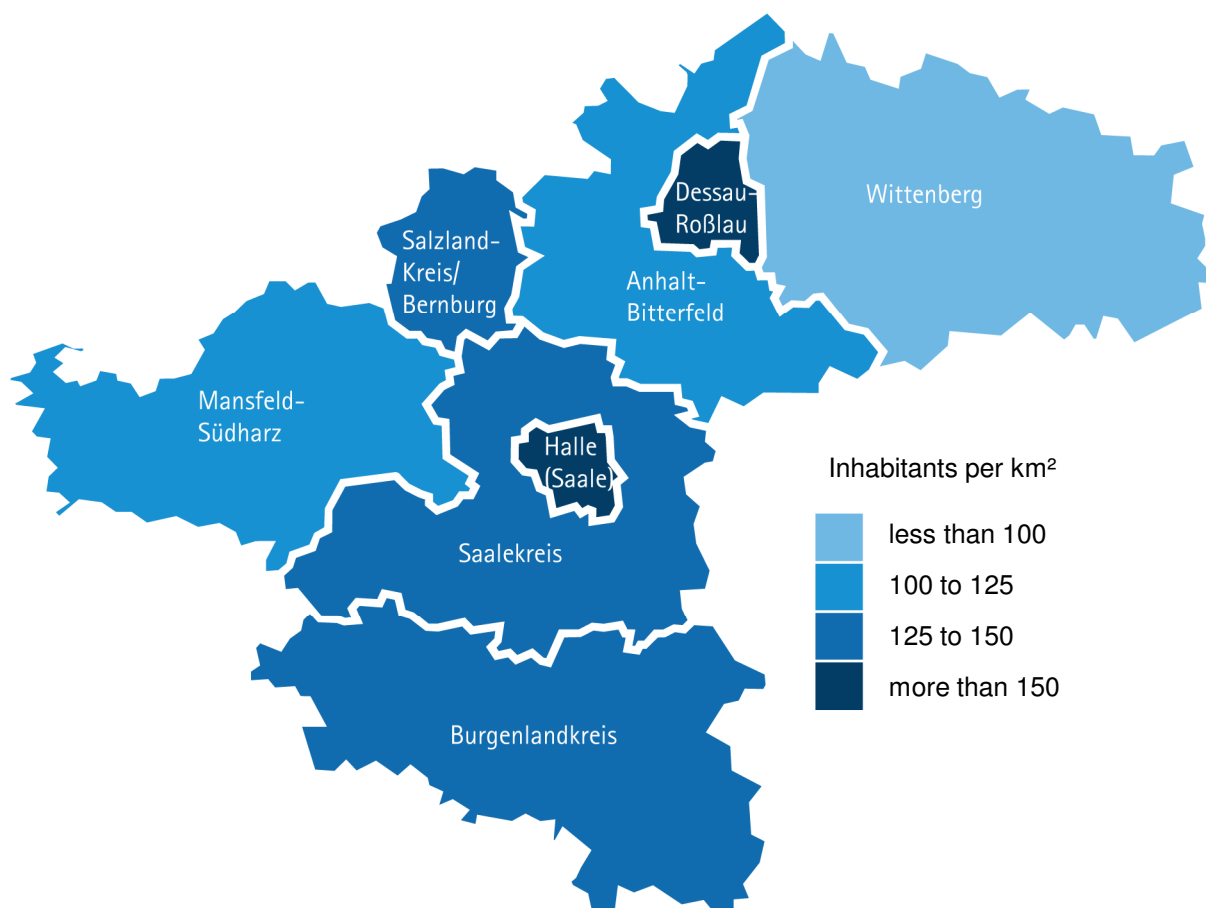

-  Headquarters of the CCI
-  Staffed offices
-  Contact centers

Source: Federal Statistical Office

The census is a complete registration of all inhabitants of a country. Here, not only the people are counted, but captures detailed information on the living conditions of the people. In addition, the existing buildings of a country are counted. The results are then used not only for one-time statistical analysis but rather as a basis for updating of all statistical quantities until the next census date.

While in the past 1987 "people, professional, building, housing and employment census" yet all 61.2 million inhabitants were interviewed (full survey), in 2011 for the first time in German history, a "register-based census" was conducted. Note that the data that already exist in the administrative registers used and complemented by a combination of censuses and sample surveys were. As a result, two thirds of Germany's population did not have to be questioned in 2011 to be coming at all levels to detailed results.

Qualification: facilitation of professional education, aptitude assessment and training

Initial financial support: subsidies for unemployed persons who become self-employed, or who accept employment in which their wage is lower than their ALG II claim as a result of social insurance contributions

Integration subsidies: compensation subsidies for companies that experience a reduction in productivity as a result of hiring unemployed persons

Support for self-employment: transitional allowances, subsidies for business start-ups, initial financial support specifically for self-employment (ICH-AG – one-person start-up) and establishment subsidies

Employment opportunities according to § 16d Social Code SGB II: support for companies that hire recipients of ALG II to social insurance-liable positions, as well as public employment of ALG II recipients with an expense allowance (a so called One-Euro-Job)

Job creation schemes / Civil work: public employment of unemployed persons

Sources: Company for Consumer Research (GfK) Nuremberg; own calculations

Retail-related purchasing power:

The portion of general purchasing power spent by consumers in mail-order and over-the-counter retail businesses.

POS sales:

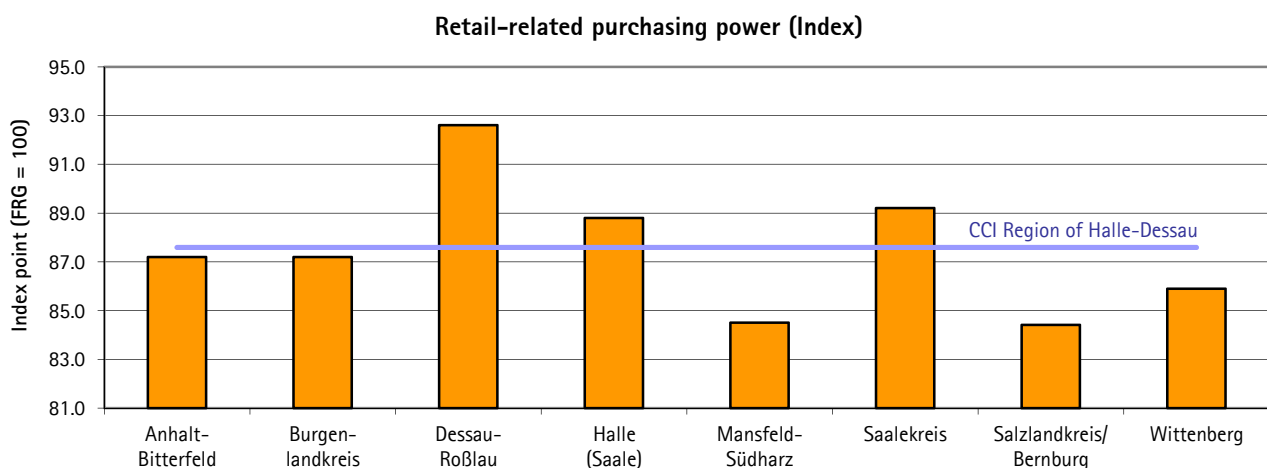

Point-of-Sale sales show a projected total turnover value for the retail sector. The index amount per inhabitant invariably correlates to the national average (Index = 100).

[An index amount of 110 shows a 10% higher gross average in sales per inhabitant in retail in this region compared to the national average. An index amount of 90 means that 10% less in sales per inhabitant is achieved in retail in this region compared to the national average.]

Retail Centrality:

Retail Centrality shows the inflow resp. outflow of purchasing power within a city as well as within an entire region and therefore indicates the attractiveness of a location.

[An index amount of more than 100 shows an existing inflow of purchasing power, meaning in this region there are higher sales in retail than people living there actually spend in retail. An index amount of less than 100 indicates an outflow of purchasing power, i.e. in this region there are lower sales in retail than people living there actually spend in retail.]
