French SME is looking for polypropylene tube's extruders for a manufacturing agreement

A French company is specialized in the design and manufacture of polymer-folded products. This folding is a real key asset allowing innovative functionalities to the processed tube. The tube could so be used in aeronautic industry, automotive industry, and many other industrial applications as a protection around parts or as functional pipe. The folded tube is revolutionizing industrial standards by significantly reducing the weight and size of the products. The French company targets a long-term supplying and manufacturing agreement with a pipe extruder.
