# Experiences of ThinkSono

The Implications of using Deep Learning in  
Diagnostic Care

We have created the world's first software to  
diagnose a deadly condition called  
**Deep Vein Thrombosis (DVT).**

# Blood Clots

# Pulmonary Embolism

Blood Clots

Bayer Pharma AG

# Problem Space

**Problem Space**

A diagram illustrating the relationship between specifications and a problem space. A central square is labeled "Problem Space". This square is enclosed within a larger, cloud-like shape. To the left of the square, the word "Specs" is written, with a horizontal line extending from it to a small circle on the left edge of the square, indicating that the specifications define the boundaries of the problem space.
