## TRAINING THE ART OF MEANINGFUL DECISION MAKING

*ODE - objectified decision engine - the social impact-app (IOS, Android, web) guides and trains individuals and organizations on their way to make better informed, transparent, and stress-free decisions. The bottom-up approach uses learning processes to eliminate stressors and thus strengthens mental health.*

*ODE offers space for the whole spectrum of decisions in private and professional life. Thus, the learned process forms the basis for active participation in society, from volunteering work and municipal participation to voting.*

- *The app offers a full range of decision-making features from simple to complex decisions with integrated sharing with peer groups and wider community*
- *Iterative features enabling users to refine their criterion and visually consolidate and summarize feedback to arrive at a decision*
- *Continuous learning and reflection with the help of the individual, historical decision database*
