# ANJA BEECKEN ARCHITEKTEN GMBH

## Mixing expertise in sustainable architectural services with a joyful artistic proficiency

*As architects we are driven by the belief that our surroundings directly influence the quality of our lives, whether at work, at home or in public spaces in between. Not only the building itself but also the quality of the urban environment affects our wellbeing. This concern for the physical context has produced a diverse portfolio of projects which are united by their sensitivity to the culture and climate of place, and by their desire to bring a new quality of life to their users and the context they inhabit.*

*Anja Beecken Architects was founded 1993 in Berlin. Our portfolio contains cultural, educative, administrative and residential buildings - single-family housing and apartment complex alike. We provide expertise for full architectural design services from concept design to construction supervision in the areas of new construction, converting existing and restoring historical buildings.*

- *Offering efficient cooperation between the fields of architecture and energy consulting, resulting in affective solutions for durable building and low energy standards*
- *Developing a wide range of projects from projecting new buildings, converting buildings to restoring historical buildings*
- *Providing expertise from concept design to construction supervision - full architectural design services*
