## IFA3D – Your way to custom medical 3D solutions!

*If every human is individual, why isn't their treatment? With the help of AM (Additive Manufacturing) it is now possible to find the right solution for each customer –  
the only border is your imagination.*

*Whether scanning, generating of 3D data (from CT/MRI/CBMT), 3D freeform modeling or 3D printing, we at IFA3D create custom-made products from one source.*

*Medically approved (DIN EN 13485), FDA certified materials (e.g., silicone, photo-polymers) guarantee a legal safe treatment.*

### *Range of products and services:*

*Custom Respiratory Masks (also available for infants), Custom Tracheostomy Solutions (cannulas, covers, buttons, adapters), Custom ETN Spacer, Custom Cleft Palate Plates, Custom Obturators, Medical Models for pre-surgery planning, classes/coaching for students, Custom Nasal Septum Buttons, Custom Fistula Solutions, Custom Implants, Custom Aids for clinics, 3D Visualizations for surgery planning, Custom Facial Prosthetics, Custom Prototyping of medical devices and parts.*

- *Fast delivery through direct data transfer via in-house server upload link; cooperative data exchange for planning, design; short production process*
- *Precise 3D multi-material printing up to 16 micron*
- *Coaching We guide and teach you and your team of students or employees through the whole production process*
