KNAUER WISSENSCHAFTLICHE GERÄTE

Providing tools for scientists and other lab professionals

The family-owned company KNAUER Wissenschaftliche Geräte GmbH has been developing high-tech laboratory instruments for research, routine analysis, purification and production for 59 years. Supporting and advancing science and technology for the common good has always been a company goal.

Today the product focus is on liquid chromatography (HPLC) that can be used, for example, to analyze food or environmental samples, as well as drugs or vaccines. The preparative KNAUER chromatography systems can be applied for the purification of proteins or other valuable substances.

The SME also supplies dosing pumps, switching valves and detectors used for a wide range of high-pressure applications. KNAUER's latest development is equipment for the high-flow production of lipid nanoparticles, utilized in mRNA vaccine production. Sustainable development and entrepreneurial responsibility towards the 160 employees as well as the environment and society are matters close to the company's heart.

- *Quality-engineered LC equipment that does its job today and is modularly designed to adapt to tomorrow's needs*
- *We also create solutions together with our customers, tailor-made to match the application and regulatory requirements*
- *KNAUER provides its modules and instruments also for other laboratory instrument companies as an original equipment manufacturer (OEM)*
