## Digital Dignity: Can you afford not to care?

*Digital Dignity is the core of our work. As a human right, this speaks to everyone and expresses our intrinsic motivation: it concerns all of us privately as humans.*

*The world today needs reachable goals to develop the way we handle digital identities worldwide. But there is no silver bullet: we stand to gain and lose too much in lifestyle, comfort and years of global development.*

*Your Digital Self is an everyday companion app for the digitally active that revolutionizes privacy by giving control over your digital identity back to you.*

*The launch of our products and services is phased. Each phase is specifically designed to pave the way for the next, overcoming both technical and emotional hurdles over time. With this multi-phased approach we reach goals that are unattainable in the current landscape while maintaining a clear path to data sovereignty every step of the way.*

### — Realization moment

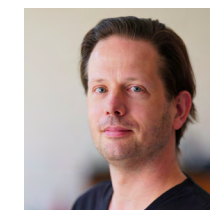

*Giving users a real insight into how much their data is being kept and utilized by companies*

### — Easy onboarding

*Sign up and connect with the platform in simple steps, less than 5 minutes!*

### — More than just control

*Our platform is ready for more advanced data utilization; giving our customers real value and insight from their digital identities*
