

Dear partners,

On February 24 the Russian Federation continued a full scale military invasion in Ukraine. Russian forces launched missile strikes on major cities, there are battles in large Ukrainian cities as well as around the critical infrastructure objects. Ukrainian Armed Forces as well as all involved men and women are bravely defending our country and resisting the occupying power in all ways possible.

Due to the war, there is a growing need for the medicines, medical devices, first-aid kits and other relevant goods in Ukraine. The team of the State Enterprise «Medical Procurement of Ukraine» along with the Ministry of Healthcare of Ukraine, other public bodies as well as volunteers, is involved in arranging deliveries of medicines to cover the needs of the medical workers, hospitals and volunteers.

The existing stock of medical goods in Ukraine is being consumed quickly. We, therefore, address all non-resident manufacturers and suppliers that can supply the medical goods for Ukraine. Attached is the list of the items that we are looking for.

Please, be informed that there are two modes of deliveries:

* Delivery to Ukraine through the Ukrainian border in the Western Part. It is possible and safe. Deliveries are held within a simplified procedure, there is no need to go through the customs clearance or any other complications. The warehouses to accept the cargo are located in the Western regions.

* Also there is a warehouse available in Helm (Poland). The items can be delivered there alternatively.

If you have the items from the list in your warehouses or if you are ready to purchase and provide them, please contact Olena Sinitsyna at olena.sinitsyna@gmail.com. She is also available at +380678642054 on WhatsApp/Telegram.

In case you are ready and willing to supply the goods mentioned in the list, please let us know the following:

1. Delivery mode preferable (to Ukraine or Poland);
2. Supply time to the point of delivery. The sooner, the better. If in batches, delivery time for each batch.
3. Goods that you are ready to supply (please see the list enclosed).
4. Quantities for each good. If in batches, quantities of goods listed within each batch.

Upon your response, we will keep you further informed on details.

We need your support. We count on you.

Team of the SE «Medical Procurement of Ukraine», volunteers, citizens of Ukraine.
