

# DOOR2DOOR GLOBAL PUBLIC TRANSPORT

## Modern transit for 146 cities, 21 countries and 5 continents

Every day door2door transports citizens safely, reliably and in an eco-friendly way to their destination. We serve more than 490 governmental, institutional and corporate customers around the globe. Our goal is to provide highly attractive public transport that is as comfortable as the private car, thus reducing emissions, traffic congestions and space needed for roads and vehicles while increasing the quality of life for citizens.

We provide traditional public transportation solutions, we offer on demand shared mobility services, we run electric and autonomous mobility, we include all mobility options within one single app and we analyse, plan and simulate everything with our award-winning technology.

Maxim Nohroudi is Board Member and Chairman of the Mobility Group of Bitkom ([www.bitkom.de](http://www.bitkom.de)), Germany's leading industry association for IT, Media and Telcos, with 2,000 member companies incl. 500 tech startups and 40 DAX companies.

- *The Company's technology platform provides modern, high quality public transportation*
- *We serve our products to consumers (B2C), to businesses (B2B) and to governments (B2G)*
- *door2door - as part of Swvl Group - is traded on Nasdaq Stock Exchange in New York City with 1,500 staff around the globe*
