

# GERMAN STARTUP ASSOCIATION

## The Voice of Startups in Germany

The Startup Association is the representative and the voice of startups in Germany.

Startups are the driving economic force of our future. Together we want to make Germany and Europe a startup-friendly environment that rewards willingness to take risks and offers the pioneers of our time the best conditions to be successful with innovative strength.

The Startup Association promotes innovative entrepreneurship and carries the startup mentality into society. We are a large network and pioneers in startup research. We give the companies of the future a strong voice in politics, business and the public.

In the last ten years we have grown into a strong community. With 1,200 members, we unite startups, scaleups, corporates and investors from all over Germany in the association.

— *Our political mission is to establish Germany as a first-choice location for international startups, since they are key drivers of innovation and prosperity*

— *The German Startup Monitor has served as most important source of information on innovative growth companies for politics and the public*

— *We pass on founding knowledge and experience from generation to generation. We take startup culture to medium-sized companies and corporates*
