IVU TRAFFIC TECHNOLOGIES AG

Integrated IT systems for bus and rail

IVU Traffic Technologies has been working for over 45 years with more than 800 engineers to ensure efficient and environmentally-friendly public transport with buses and trains.

IVU.suite's integrated standard products cover all bus and rail companies' processes: from planning, dispatching, and fleet management to ticketing, passenger information, and the settlement of transport contracts. By working in close partnership with our customers, we guide enterprising and ambitious IT projects to success and ensure reliable mobility in the world's metropolises.

— *IVU.suite is the end-to-end IT solution for bus and rail*

— *More than 500 public transport operators worldwide rely on IVU solutions*

— *IVU serves the French market from Paris and expects more demand from smart cities initiatives and the upcoming liberalisation of regional rail services*
