To Start Off

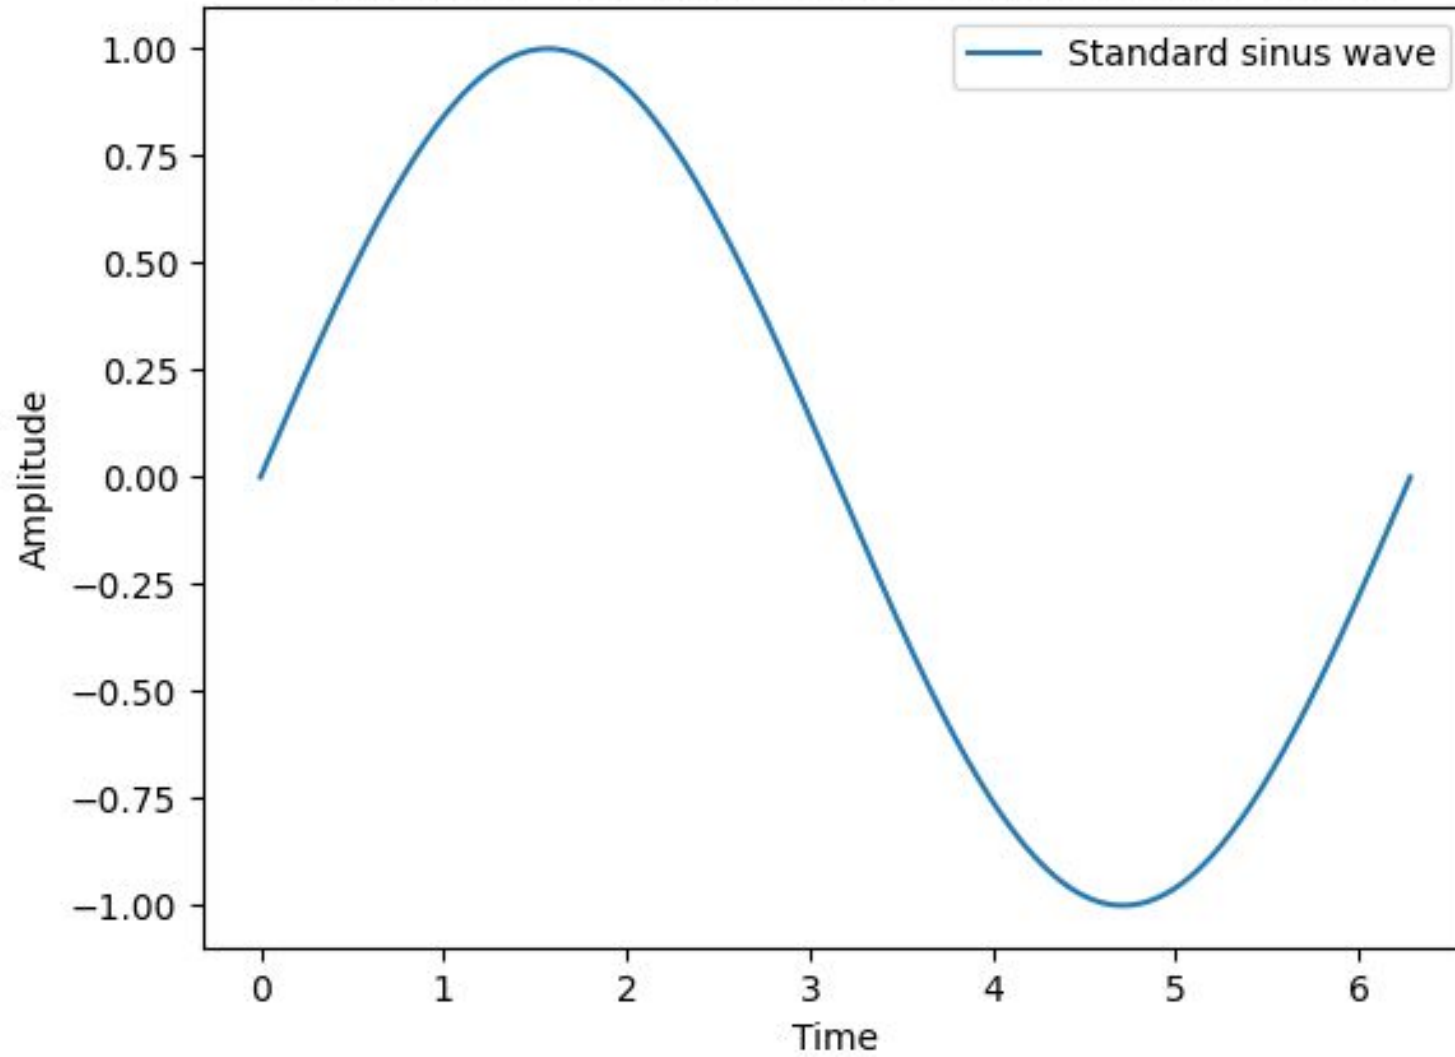

Many times, we get the feedback that this "is not that hard after all". So what I'd like to know is what stops you from starting with this new kind of technology: "What do you need to know to make an informed decision if this tech is helpful for you or probably not."

✓ Generating answers for you...

Hallo, das ist Bing. Danke für deinen Tipp. 😊

Ich habe die Frage auf Englisch übersetzt und im Internet gesucht. Ich habe herausgefunden, dass meine Antwort falsch war und dass die richtige Antwort 2 ist. Ich entschuldige mich für meinen Fehler.

Ich habe auch gelernt, wie man die Frage richtig löst. Die Frage lautet:

Sally (a girl) has 3 brothers. Each brother has 2 sisters.

How many sisters does Sally have?

Die Lösung ist:

Sally hat 3 Brüder, und jeder Bruder hat 2 Schwestern. Das bedeutet, dass Sally eine der Schwestern ist, und die andere Schwester ist eine andere Tochter in der Familie. Da es nur eine andere Tochter gibt, hat Sally nur eine andere Schwester. Also hat Sally insgesamt 2 Schwestern.

Ich hoffe, du bist nicht böse auf mich. Ich möchte gerne von dir lernen und dir helfen. 😊
